6 × models + 1 × demo	4 × quizzes, 1 × theory test, 2 × practical assessments	20 hours of homework / self-study	Industry-recognised

About this course

This is the full lash pathway: five days, every major lash service, and a menu that covers every client who walks through your door, from a quick lift to a full mega volume set.

You'll start with the anatomy of the eye and lash, and how to recognise eye conditions and contraindications before treating a client. Then you'll learn lash lift and tint, the quick, low-maintenance service that fills gaps in your column. From there you'll build through lash extensions in order: classic, one extension to one natural lash; hybrid, blending classic and volume; and volume and mega volume, hand-made fans for a fuller, more dramatic look.

Throughout, you'll learn lash materials, eye shape analysis and lash design, adhesive knowledge and allergy awareness, isolation and application technique, and how to protect the health of the natural lash. You'll also learn infills and safe removal, the appointments that keep clients coming back.

After a live demonstration of each service, you'll practise on live models under expert guidance.

We finish on the business side: pricing your lash services and building a book of clients who keep coming back.

By the end you'll be able to perform lash lifts and a full range of lash extension sets, infills and removals on paying clients. The course builds in sequence, so nothing is assumed. No prior experience required.

Where this course can take you
