About this course

Classic lashes are the foundation of every lash career. One extension is applied to one natural lash, and getting that right (clean isolation, the right length and curl, a secure attachment) is the skill every other lash style builds on.

You'll start with the anatomy of the eye and lash, and how to recognise eye conditions and contraindications before treating a client. You'll learn the materials, lengths and curls available, adhesive knowledge and allergy awareness, and how to analyse each client's eye shape to design a set that suits them.

From there you'll learn isolation and application technique step by step, building speed and precision while protecting the natural lash, then infills and safe removal. Troubleshooting, hygiene, product and tool knowledge and aftercare are covered throughout.

After a live demonstration, you'll practise on live models under expert guidance.

By the end you'll be able to apply a full set of classic lashes, infill and remove them on paying clients, and you'll meet the entry requirement for our hybrid and volume course. No prior experience required.
