LIVE MODELS	ASSESSMENT	HOMEWORK	CERTIFICATE
4 × models + 1 × demo	3 × quizzes, 1 × theory test, 1 × practical assessment	None	Industry-recognised

About this course

Korean lash lifting is the next step on from a traditional lift. It uses gentler cysteamine-based solutions in place of traditional perming chemicals, with shield techniques that lift from the root for a softer, more natural curl. Clients can see the difference, and it commands a higher price.

This course covers the method in full. You'll learn the anatomy of the eye, lash anatomy and growth cycles, how cysteamine solutions compare to traditional perms, and how to select the right products, tools and shields.

You'll practise the different shield methods and processing times, learning to match each to the client's lash length and eye shape, then integrate hybrid dye for a finished, tinted look. Consultation, eye conditions and contraindications, patch testing, eye safety, hygiene, troubleshooting and aftercare are covered throughout.

After a live demonstration, you'll practise on live models under expert guidance.

By the end you'll be able to perform Korean lash lifts confidently on paying clients. No prior experience required.

What's covered

- Anatomy of the Eye
- Lash Anatomy & Growth Cycles
- Consultation
- Eye Conditions & Contraindications
- Patch Testing
- Korean Lash Lifting Fundamentals
- Cysteamine vs Traditional Perm
- Products
- Tools & Shield Selection
