About this course

Lash and brow tinting is one of the quickest, most affordable services on any menu, and one of the best ways to bring new clients through the door. With hybrid dye, you can offer longer-lasting colour than traditional tint.

This one-day course covers the anatomy of the eye, the structure of the hair follicle, how tint and hybrid dye differ, and how to choose the right one for each client.

You'll learn to check for eye conditions and contraindications, basic brow mapping so colour is placed where it flatters, then patch testing, application and colour matching for both lashes and brows, working safely around the eye. Troubleshooting, sanitisation and aftercare are covered throughout.

After a live demonstration, you'll practise on live models.

By the end you'll be able to tint lashes and brows with tint and hybrid dye confidently. No prior experience required.

What's covered

- Anatomy of the Eye
- Structure of the Hair Follicle
