LIVE MODELS	ASSESSMENT	HOMEWORK	CERTIFICATE
4 × models + 1 × demo	2 × quizzes, 1 × theory test, 1 × practical assessment	None	Industry-recognised

About this course

A lash lift is one of the easiest treatments to fill a column with. It takes about an hour, needs no upkeep between appointments, and clients rebook every six to eight weeks for lashes that look curled and tinted from the moment they wake up.

You'll start with the science: the anatomy of the eye, the structure of the hair follicle, the stages of lash growth, and how lifting solutions work on the hair. You'll learn how lash lifting compares to other lash services, how to consult and check for eye conditions and contraindications, and how to patch test safely.

From there you'll learn the full lift step by step, including shield selection and processing times, then finish with hybrid dye: how it differs from traditional tint, and how to colour match for each client.

After a live demonstration from one of our trainers, you'll practise on live models, learning to work safely around the eye, troubleshoot common problems and give clear aftercare advice.

By the end you'll be able to perform a lash lift with hybrid dye confidently on paying clients. No prior experience required.

What's covered

- Anatomy of the Eye
- Structure of the Hair Follicle
- Stages of Hair Growth
- Industry Comparisons
- Consultation
- Eye Conditions & Contraindications
- Patch Testing
- Lash Lifting Techniques
- Shield Selection & Processing Times
