About this course

Learn to deliver a professional manicure and pedicure from consultation to massage. You'll cover the foundations — nail anatomy and health, nail systems, professional prep, filing and buffing, and salon-standard sanitisation and sterilisation — then move into the anatomy of the hand, foot and lower leg, and the disorders and contraindications you need to recognise before treating a client.

From there you'll work through the full step-by-step manicure and pedicure routine, finishing with hand and foot massage. We also cover pricing your services profitably and the essentials of starting out in the beauty industry. No prior experience required.
